

TEN REASONS TO BECOME A STATE

American statehood would solve all of Alberta's problems...

- 1. Demographics—BC, Central/Eastern Canada are rapidly aging and retiring. Alberta has a young, hardworking populace that is blessed with outstanding natural resources (the world's third largest oil reserves). Our wealth will continue to be confiscated to support social programs for the rest of Canada, leaving us impoverished.**
- 2. 87% of our exports go to America; statehood would ensure these continue uninterrupted by tariffs/border closures.**
- 3. A massive influx of investments and capital (estimates are a minimum of \$200 Billion > immediately).**
- 4. The ability to get our oil to tidewater at world, rather than discounted prices.**
- 5. The elimination of provincial transfers including equalization payments.**
- 6. Lower taxes, no carbon tax, and possibly no personal state income tax given the amount of revenue generated by unprecedented economic activity (9 states already do not levy personal income tax).**
- 7. Fair representation in the 3 equal branches of America's federal government, which includes an elected, equal and effective Senate. Having 3 equal branches ensures numerous checks and balances on power.**
- 8. The right to create our own constitution.**
- 9. The right to create our own healthcare and pension plans.**
- 10. Security provided by the most powerful military in the world.**
